

Ontario_Landclass_V2.0

Custom Landclass
for all of Ontario
Flight Simulator 2004

Let me first point out that this add-on is not a necessity for any of our southern Ontario but it greatly enhances the look of the scenery and the flight experience.

Installation:

1. Scenery is greatly enhanced with Ultimate Terrain, accurate rendition of roads, coastlines, lakes, rivers and other terrain features.

Ultimate Terrain can be purchased at <http://www.flight1.com/>

2. Unzip the scenery to the folder of your choosing "Ontario_Landclass_V2.zip".

3. Run Ontario_Landclass_V2.exe

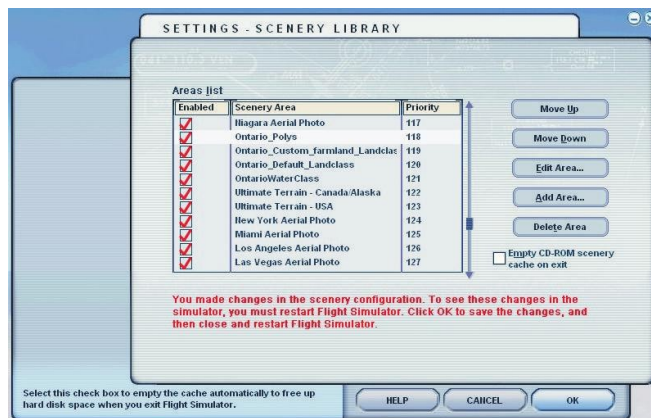

4. Activate the the 3 scenery areas in simulator:

Ontario_Custom_farmland_Landclass

Ontario_Default_Landclass

Ontario_Polys

in the order as shown in this simulator library screenshot.

Note:

The scenery areas layers in comparison to Ultimate Terrain and Niagara Photo (Hamilton and Oakville Photo terrains should be higher in the list than these 3 scenery areas).

Original Flight Ontario's OntarioClass landclass files by Al Sibley and John Gooch which are included in this scenery project should be deleted or unticked (see screen image to right).

LOD5_Toronto_Default
LOD5_Toronto_Farmland
OntarioClass
OntarioClass2
Soolandclass
Northern Ontario LC

The 3 individual scenery areas covers all of Ontario tapering off at the borders to the US, Manitoba, Nunavut and Quebec. It includes both default use of Landclass, custom Farmland Landclass and terrain polys similar to what was used in LOD5 Toronto. The scenery is based on land use map found on the [Ministry of Natural Resource website](#).

What is Custom Farmland Landclass?

“Custom Farmland Landclass” is a custom landclass project which works with Ultimate Terrain. It basically turns the farm fields etc., to appear at right angles to the Ultimate Terrain roads

“A picture is worth.....”

Default FS9 textures with Ultimate Terrain

Now, Ontario Default Landclass with Ultimate Terrain

Finally, “Custom Farmland Landclass” with Ultimate Terrain

Custom textures and agn files used in Ontario Farmland Landclass:

Number used In EZ Land class		texture file name root	Orientation
(in FS9)	(in FSX)		
35	35	004b2	00CC
117	117	045b2	29CC
38	76	005b2	14CC
111,115	111,115	039b2	19CC
30	30	007b2	19CW
